

Cares for people's health

"At GSF, we evaluate processes developed to remove bacteria, viruses, particles. Through scientific testing and control measurements, we approve those processes that have optimal effectiveness for our customers' facilities. At GSF, we care for people's health."

Jean-Claude Le Touze, GSF Microbiologist

Overwhelmed by questions on your H1N1 protection plan ?

With our expertise in cleaning & sanitization, we will efficiently help you create your contingency plan.

- Cleaning processes developed by our Microbiologist in our Research & Development department
- Employees highly trained on our special cleaning processes created for pandemic flu prevention and contamination
- Cleaning processes that are performed as sustainable as the circumstances allow us
 - Protected employees with Personal Protection Equipment

Let us help you build up a Prevention Cleaning Program !
